

PRODUCT REFERENCE / GP-01

Greaseproof Paper

Product Specification Reference Sheet

Reference information for grease-resistant paper used in wrapping, baking and food-service converting. Final performance depends on the selected grade and intended contact conditions.

Reference item	Information
Typical basis weights	35 / 38 / 40 g/m2
Grease-resistance reference	KIT level 7
Basis-weight tolerance	+/-5%
Density	≥ 0.75 g/cm3
Moisture	6 +/-2%
Typical applications	Food wrapping, liners, baking and grease-resistant converting

REVIEW NOTES

- KIT performance is a grease-resistance indicator; it is not proof of food-contact compliance or PFAS status.
- Confirm the applicable test method, temperature, contact time, food type and finished construction.
- Request product-specific supporting documents for the selected grade and destination market.

IMPORTANT: This KenShun Paper document is a product reference sheet compiled for inquiry discussion. It is not a certificate, declaration of conformity, mill-issued specification or batch test report. Final specification, tolerances, document availability and compliance evidence must be confirmed for the selected grade, supplying mill, intended use and destination market before purchase.
