

PRODUCT REFERENCE / KL-01

Kraft Linerboard

Product Specification Reference Sheet

Reference information for initial grade comparison and purchasing discussion. Select the final grade according to converting method, packaging application and performance target.

Reference item	Information
Typical basis-weight range	Premium grades: 126-230 g/m2; standard grades: 126-300 g/m2
Key properties to confirm	Burst index, ring crush (CD), Cobb 60 s, internal bond and moisture
Common formats	Rolls or sheets, subject to order confirmation
Typical applications	Corrugated packaging, cartons, liners and industrial converting

REVIEW NOTES

- Confirm exact grade, basis weight, size, testing method and tolerance before ordering.
- Suitability for frozen, aquatic-product or agricultural packaging requires application-specific review.
- Special converting, coatings and food-contact use must be agreed separately where applicable.

IMPORTANT: This KenShun Paper document is a product reference sheet compiled for inquiry discussion. It is not a certificate, declaration of conformity, mill-issued specification or batch test report. Final specification, tolerances, document availability and compliance evidence must be confirmed for the selected grade, supplying mill, intended use and destination market before purchase.
