Breaking length (MD)	>=8,000 m
Tear strength (CD)	>=300 mN
Moisture	6-8%
Typical applications	Food wrapping, release applications and specialty converting

REVIEW NOTES

- Confirm the current specification, intended use and test method before ordering.
- Baking temperature, release performance and food-contact suitability require separate confirmation.
- Final packaging and technical values are subject to the approved sample and purchase specification.

IMPORTANT: This KenShun Paper document is a product reference sheet compiled for inquiry discussion. It is not a certificate, declaration of conformity, mill-issued specification or batch test report. Final specification, tolerances, document availability and compliance evidence must be confirmed for the selected grade, supplying mill, intended use and destination market before purchase.
